or email us at  
sales@tsimapping.com for  
all your mapping software,  
data and service needs!**

MI Professional v10.0 enhancements are in 3 key areas:

⇒ **User Interface**

- New, flexible user interface allows users to dock toolbars on any side of the application for better organization.
- New icons for a more familiar, clear look.
- Redesigned layer control
  - \* Dock, float or hide the layer control
  - \* Change the style override and see results instantly; use the new preview button too see styles before you apply.

⇒ **Data Access**

- Microsoft Office 2007
- PostGIS
- SQL Server 2008 (Spatial)

⇒ **Map Output**

- Dynamic Scalebar—now the scalebar will change dynamically as you pan and zoom in your workspace.
- Layered PDF—print maps to a pdf document that allows readers to turn visibility on and off.

***These are just a few of the new features!***

## **MapInfo Professional Upgrade Specials May 11th—June 15th, 2009**

**With the release of MIP v10.0 at the end of June, Maintenance and Tech Support is mandatory. Take advantage of Promo Pricing in effect from 5/11-6/15/2009.**

**Call TSI toll-free for details: (866) 874-6277**

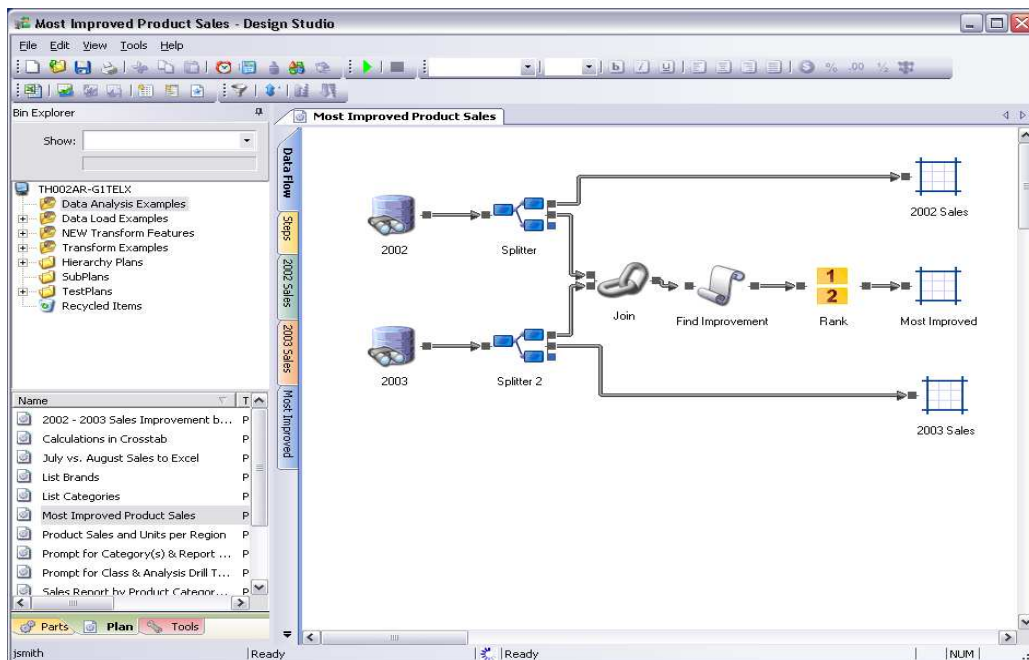

# DataFlow Product Suite

***Are you an SMB or departments within a larger enterprise who need the ability to integrate data from a variety of data sources and create analytics of the results?***

DataFlow is a Business Intelligence and Data Integration solution in a single product. From a single interface customers are able to create a wide variety of business applications that help them better understand their business and their customers.

## Product Features:

- Easy to Use “Drag and Drop” Interface (Requires no coding or SQL for 99% of all tasks)
- Single Tool for both Business Intelligence and Data Integration Needs
- Over 100 pre-built data transformations and analytical tools
- Easy access to most major RDBMS and text data formats (XML, CSV, hierarchical flat files and most major RDBMS databases)
- Native connectivity to most major CRM and ERP systems
- Reporting, charting, graphing, OLAP and Excel support
- Geospatial data structures
